Mission

We create cutting-edge solutions for some of the largest companies in the telecom and healthcare industries across the MENA region. We facilitate systems that work with real conditions and work closely with your operations to ensure a smooth & successful deployment. Our agile solutions fit your budget needs & make transitioning easy so that you can focus on the real business of patient care.

Position in the Market

About Apex

A health information system (HIS) that provides the tools providers and executives need to realize resource-saving, high-quality patient care. Our customizable modular clinical and business solution means you have the flexibility to choose the functionality you need today, adding new modules when the need arises tomorrow.

- Functional & Technical Support
- System Integration & Upgrades
- Flexibility & Customized Solutions

Standards

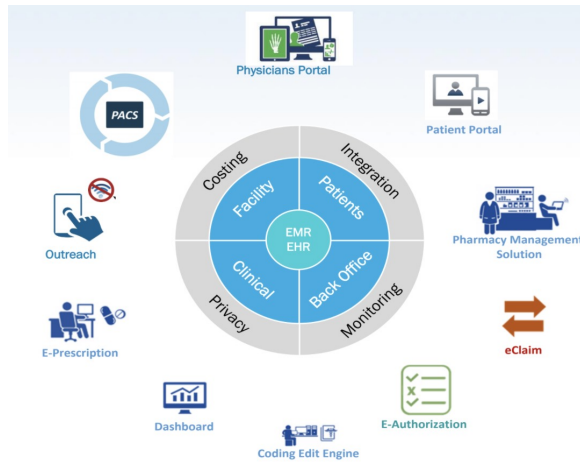

- JCI Clinical Documentation
- IHA
- HL7
- ISO
- DMSM
- HIPAA
- Europrise

Our Story

In 1994 we were a group of friends with an idea to build ATS, the first enterprise solutions company in Palestine. ATS went on to become THE market leader & was acquired by Paltel in 2006. Our next venture, Dimensions Health Care, was founded in 2010 to address the need for specialized health care and insurance solutions and was acquired by IMS International in 2016. At the same time, we heard from clients across the MENA region who were tired of losing money and time on the boxed solutions flooding the market. They needed high-quality, customized, and standards-aligned HIS solutions with exceptional integration capabilities and we knew we could deliver.

We called it Dimensions Infotech.
